

Full-function touch screen tandem controller

- 8, 10, 15 inches, controller size to meet the needs of various places
- Support Yaskawa Mechatrolink-II serial communication
- Equipped with RS485, VGA, USB, 10 / 100M network port, D / A (5V) for input of external equipment / Out
- equipped with handwheel interface for external expansion

Highly integrated customized development tools

- Using computer operation to easily customize screens and functions
- Making suitable systems based on industrial characteristics
- Can be used in the automation industry Case
- Macro program, PLC secondary development, highly integrated software and hardware

Support multi-axis interpolation

- Follow the advantages of high-speed and high-precision CNC system, support path interpolation, smooth speed planning
- support smooth corners, increase pick-and-place efficiency
- provide linear and circular instructions

Diverse accessories and system options

- RIO: Expandable up to 64 I / O
- AD / DA -Vision
- positioning module -Cloud
- monitoring and analysis system
