

## FLEXEM TECHNOLOGY CO., LTD.

**FLEXEM TECHNOLOGY CO., LTD.** is a leading and innovative provider of industrial automation core components and digital integration solutions.

With precision motion control at its core and digitalization as the foundation, FLEXEM offers a wide range includes servo drive systems, PLCs, HMIs, WebSCADA, remote I/O, IPCs, industrial gateways, high-performance servos, digital platforms, etc.

Luna Technologies and FLEXEM have joined hands to collaborate and develop solutions for the Indian market. This partnership aims to leverage the strengths of both companies in industrial automation and digital integration, bringing innovative and efficient solutions to various industries in India, with a focus on supporting system integrators (SI) and OEMs.

### FlexemHMI Product Mix

FS FS2.0 development platform		FS FS3.0 development platform		FSU development platform
4-core high-performance processor				
Simple device application	Standard equipment application with IoT capabilities		Large equipment applications, complex projects	High-end equipment application
3000 series	6300 series	7000 series	9000 series	FPad series
				
Cost-effective HMI	Plug and play IoT HMI	Built-in IoT HMI	Supports tag variables and complex projects	Project reuse and rapid development
HD, high brightness, wide viewing angle	HD, high brightness, wide viewing angle	HD, high brightness, wide viewing angle	Support a large number of tag communication protocols	Development based on object-oriented programming
High cost performance	Support IoT module –Flink? FWay?	4 -core 1GHz high-performance processor	Support thousands of frames; Support hundreds of thousands of data points;	Support web access

## FPad9 series appearance

The Flexem FPad series is a new generation of intelligent Human-Machine Interfaces (HMIs) designed for industrial automation and digital integration. These HMIs feature high-resolution displays, advanced connectivity options, and powerful performance capabilities. The FPad series supports flexible software access, data management, and integration with third-party systems, enhancing user experience and operational efficiency.
